

We are Doorform Industries, a pioneer in providing high performance doors across INDIA and an emerging door brand in Chennai, adopt cutting-edge German technology to design, build and supply doors for industrial, commercial and residential applications.

Established in the year 2018, by a professional team with over ten years of vast experience in the industrial doors field, started with a key focus to provide befitting products and services while maintaining high level of ethical standards by ensuring our products are designed and delivered in accordance with the customer requirements.

Our team has prior worked with leading automobile companies of [Maruthi Suzuki](#), [FIAT](#) & [Tata Motors](#) in Acoustic Projects (Engine Test Cell) and Powertrain companies like [Horiba](#), [AVL](#) and other MNC's inc. [Shell](#), [Saint Gobain](#), [MRF](#), [Caterpillar](#), [Ford India](#), [TCI Logistics](#) etc.

Having strong exposure in industrial doors ranging from Rolling Shutter to Acoustic Doors, we have built our presence over the years across diverse markets to become a leading trusted brand in Chennai. Since it's inception, the company made "CUSTOMER SATISFATION" it's priority, and continues to provide quality products and services to it's customers.

## INDUSTRIAL Sectional Doors

We offer a complete range of Industrial Sectional Overhead Doors, either insulated sandwich panel door or glazed door. Our doors are specifically designed to suit the modern industrial architecture and are made of steel panels which guarantee maximum security and reliability. The double-skinned PUF core design is heat insulating and particularly suitable for heated halls. Ideal for all industrial and logistic needs and are built to help the highest ease and flexibility of use.

Dock levelers are the bridges for simple, swift and economical flow of work. These Dock Levelers are well-designed solutions for precisely compensating the differences in height between various lorry floors and ramps. It has come with 2 lifting cylinders and a cylinder for the lip are the right choice for any situation, easy to operate and, above all, safe.

Equipped with high load bearing capacity, these dock levelers are offered in customized solutions to meet the specific demands of our clients.

## DOCK Leveler

Dock Shelters are enclosures that seal the perimeter of the trailer and form a seal by applying pressure against the sides of the trailer with industrial fabric curtains fitted with fiberglass stays. The seal at the top is created with a curtain designed to reach down to the trailer.

This header curtain may be weighted or simply constructed of fabric, and may be self-adjusting or require pull-rope adjustment depending on the model. By design they are able to fit larger dock door openings & service a wide variety of trailer heights and styles.

## DOCK Shelter

## High Speed Doors

High Speed Door is designed for indoor use and ensures rapid handling operations between different areas that should remain separated. These safe & efficient industrial doors are made of steel frame and covered with PVC.

High-quality panels, the resistivity safety edge fitted to the bottom edge of the door, photocells and barriers make this product safe and durable, and advanced safety systems along with tight sealing and pressure resistance to help isolate or control environments.

## Garage Doors

Garage Doors are available in a variety of sizes and styles, provides strength and security, and it is balanced by either torsion spring system or a pair of extension springs.

A remote controlled motorized mechanism adds safety, convenience and security. Extra strength is available with two or three layers of galvanized steel with a low gauge number (23-24 gauge steel panels). Wood finish garage doors are also available based on client requirement.

## FIRE RATED Rolling Shutter

2-Hour Fire Rated Shutter Door (FRSD) are the perfect application for hospitals, shopping centres and various industrial applications.

FRSD designed for external or internal applications where increased fire protection is required. It provides incredible radiant heat protection with a sole reliable operation through a simple control panel that can be adapted for a range of activation methods.

FRSD door are custom made to fit any opening, are available in galvanized steel and can be powder coated to suit any project regardless of its complexity.

## Insulated Rolling Shutter

Insulated roller shutter with double wall system and insulated material (Rockwool / PU ) inside. It grants an optimal thermal and acoustic insulation. The use of profiles with reinforced section helps to increase the rigidity and withstanding of curtain.

## Continuous Rolling Shutter

Shutters with continuous profile are made of GI sheet with thick steel and have an interlocking feature. The sides are stitched with a nylon felt for smooth and almost completely silent operation hence also eliminating the need for lubricants or grease.

## Rolling Shutters & Accessories

At Doorform, we manufacture extensive range of rolling shutters as per Indian Standard 6248-1979 for commercial and residential applications like MS, GI and Aluminum Shutters. We have various types of slats like: Polycarbonate, Perforated, Grill, Honey Comb, and Grill type slats.

Our shutter is made of 75 mm wide of MS / GI laths from: 0.8 / 1 / 1.2 mm thick or 21 / 19 / 18 gauge with Manual, Gear, Motorized and Geared Motor. We supply a wide range of rolling shutters inc:

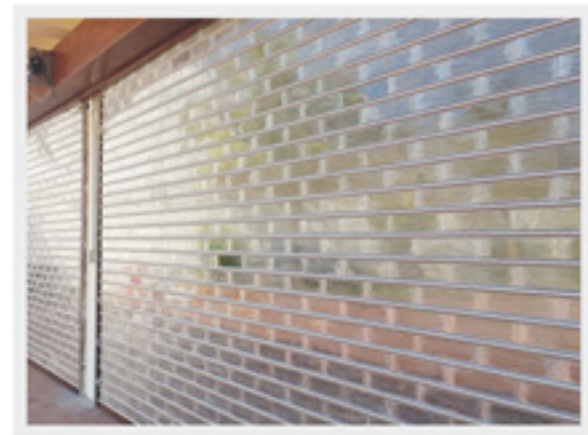

- Manual
- Motorized
- Polycarbonate
- Gear
- Grill
- Link Type
- Brick Type

## FIRE RATED Steel Doors

Fire-Rated Steel Door play a vital role in keeping people safe and minimizing property damage during a fire. Doorform brings you the right solution for all types of Fire rated doors and windows with complete accessories and products. All our products are certified by Govt approved 3rd party certifying agency like CBRI. Fire Rated Doors are being manufactured using Honeycomb infill or Rockwool infill or with PU foam infill which will act as insulating material.

- Door frames are also manufactured using 1.6 mm thick GI Sheets for long durability against corrosion.
- The door skin is 1.2 mm thickness of GI Sheet and both door & door frames are coated with PU paint.
- Hardwares, seals and accessories can be selected as per functional requirements.

We are specialized in the following products such as:

- Steel Door and Windows (Fire / Non Fire rated)
- Acoustic Door and Windows
- Fire Rated Wooden Door
- Shaft Door (Fire / Non Fire rated)
- Clean Room Door
- Scientific Door
- Sliding Door (Manual / Automatic)

## ACOUSTIC Doors & Windows

Our Acoustic Door are filled with high quality and high density rockwool, and the sides and bottom are equipped with EPDM and Aluminum seals to ensure good sound insulation and sealing effect.

Standard and optional hardware accessories are CE rated to ensure the stability of door body. In addition to fire protection, the doors has good sealing performance to achieve 35 dB to 50 dB.

Acoustic Door and Windows are used in:

- Recording Studios
- Music Halls & Concert Venues
- Engine / Vehicle test cell
- Libraries
- Operating theatres
- Museum

## Louver Door & Panel

We offer louvers in any style and customized size as per the application. The purpose of louver is to provide ventilation, while offering defense against vision and water. In addition, the louver designs must give the architect aesthetic flexibility to enhance the building's appearance.

## Sliding & Folding Polycarbonate Shutter

Manually operated by hand, simply slide left or right depending on locking configuration, it is suitable for a wide range of commercial and domestic applications with either internal or external installations inc: shopping centres, shop fronts, bar frontage, counter tops, serveries, clubs, doorways, and hotels.

### Key Features:

- UV Protection - 80% of the ultraviolet
- ECO-friendly, with RoHS, recycled.

## Sliding Glass Door Operator

Our sliding door operator provides intensive duty cycle and comes with safety edge device. We bring together concepts of Glass with auto mechanism to simplify Corporate & Individual customers.

## INSULATED Sliding Door

We supply Insulated Sliding door with 45 mm to 100 mm thick door leaf with poly urethane (PU) infill in both manual & motorized operations controlled by sensors. These door are used in cold rooms, automobile test cells etc to maintain the inside temp of the room.

## Boom Barrier

A boom barrier, also known as a boom gate, is a bar, or pole pivoted to allow the boom to block vehicular or pedestrian access through a controlled point. Typically the tip of a boom gate rises in a vertical arc to a near vertical position.

We offer wide range of boom barrier with net clearance from 2.5 m to 12 m solution for selecting access points in residential and industrial areas, even when traffic volumes are high. We provide high-tech and automatic boom barriers for reliable access control operations for complete security point.

## Bollards

Our Steel Bollards are widely used to form a protective or architectural perimeter. After installation, these bollards act as a visual guide, guide traffic and mark boundaries. It can also be constructed to block vehicle entry, protecting people and building.

Our bollards are made of high quality stainless steel, giving impeccable appearance and long life. We provide bollards for site work, security, traffic flow control and other applications with the following types of **Fixed and Telescopic Bollard**.

## Retractable Gate

We supply Stainless Steel and Aluminium Retractable Sliding Gate equipped with in-built Led light, motor with smooth noiseless function.

- Need minimum space require when it's open
- Ideal for curved opening
- Easy manual over ride in case of power failure
- Motor protected with internal thermal switch
- Auto stop at opening & closing position

Infrared anti-collision device will make sure that if there is pedestrian or vehicle approach the gate during closing process, the gate will automatically stop to avoid collision.

## MOTORIZED Awnings

Our range of Motorised Awnings, Blinds and Curtains are the perfect addition to any home and shops. With retractable awnings, you can extend them to protect against direct sun for shade.

With the single press of a button, you can add comfort and convenience to your outdoor entertaining. Our motor is endowed with resistance-stop function and many other innovation functions.

## MOTORIZED Roller Blinds

Motorized Roller Blinds can install in indoors with inner double glazing to avoid the adverse effect of outside and improve the service life of the system. It can block the sunlight in summer and reduce air conditioning load, also can adjust visual comfort and realize various kinds of intelligent control to meet your requirements.

- Super Quiet & Parallel connection function
- Narrow / High Roller Blinds function
- Setting the third limit position function

## MOTORIZED Curtains

Motorized curtain is widely used in hotel rooms and residential rooms, this motor is endowed with resistance-stop function and many other functions.

- Elegant operate function
- Electronic limit
- Light open and light close function
- Built-in radio receiver
- Resistance-stop function
- Light touch-start function
- Power off-manual function
